

CASED-HOLE DATA ANALYSIS & INTERPRETATION

**Independent insight.
Decisions you can defend.**

Specialist analysis for operators and service companies worldwide.

ansa-data.com

WHY ANSA

Independent insight, delivered as part of your team

SPECIALIST EXTENSION

Innovative, impartial and transparent cased-hole processing, analysis and interpretation for energy projects worldwide.

Our Aberdeen analyst hub works with analysts based globally to support clients around the clock—bringing multidisciplinary, multilingual expertise to well interventions and long-term programmes.

**LIVE JOB SUPPORT · PROGRAMME INPUT

COVERAGE

TOOL-AGNOSTIC

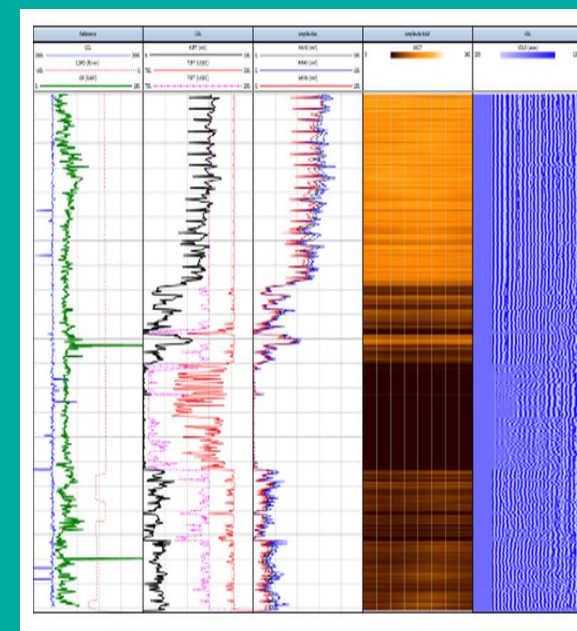

VARIOUS LOGGING TOOL SUPPORT

Well integrity evaluation builds the full picture of barrier performance across tubing, casing, liners and cement. ANSA integrates multifinger caliper, magnetic-thickness, leak-detection and ultrasonic data to identify deterioration and quantify uncertainty.

Manage risk, extend operating life and make qualified decisions — with 24/7 rapid-turnaround support when remedial workover decisions cannot wait.

CEMENT EVALUATION

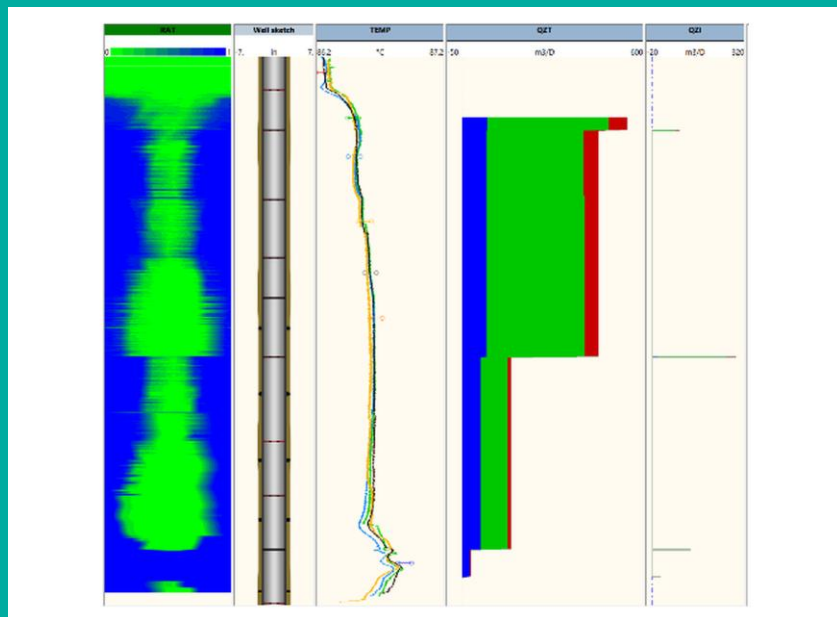

ANSA DATA ANALYTICS

Translate complex data into better production decisions

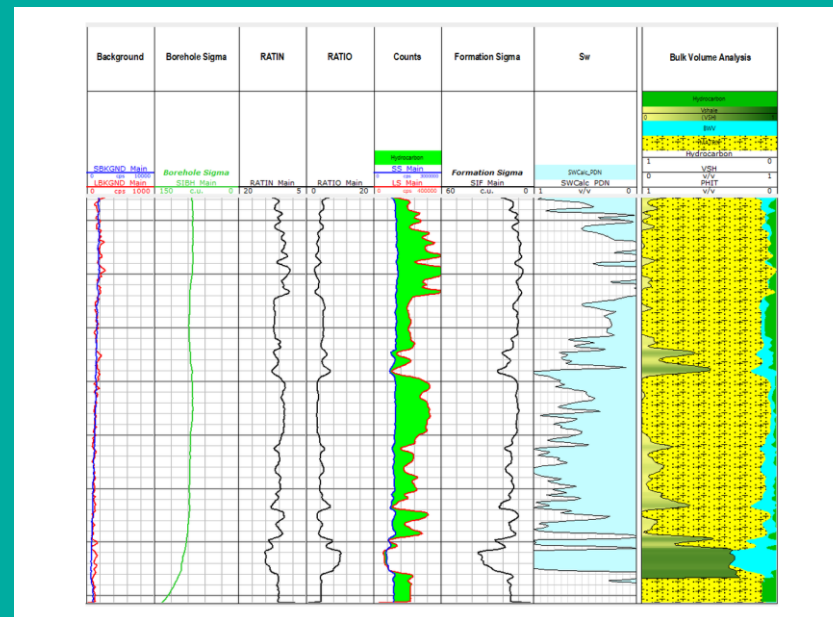

From injection surveys to complex multilateral producers, ANSA has supported thousands of PLT wells and analysed millions of feet of log data. Our pulsed neutron analysis helps you better understand your reservoirs and unlock the full potential from your wells.

PRODUCTION LOGGING

Identify inflow and zonal contribution, map thief zones and water ingress, diagnose cross-flow and mechanical leaks, and support targeted intervention. Fast-turnaround analysis is available for time-critical decisions.

PULSE NEUTRON

Use sigma and carbon-oxygen approaches to interpret mineralogy, porosity and saturation—and unlock more value from the reservoir.

WORKING WITH ANSA

Support that scales with your programme

From our Aberdeen analyst hub, supported by analysts based globally, ANSA scales from well interventions to long-term programmes.

01 ANSA SERVICES

With analysts based internationally, we support operators and service companies — delivering impartial insight and real value to energy projects.

02 CONSULTANCY & TECHNICAL ADVICE

Objective interpretation validation, logging programme design, technical advice and bespoke specialist advice.

03 TRAINING

Entry-to-expert training in production logging, well integrity and reservoir evaluation, configured to your team.

Analysts based globally.**

ANSA SERVICES

Independent expertise—from well interventions to long-term programmes

From our Aberdeen analyst hub, supported by analysts based globally, ANSA supports operators and service companies around the clock—delivering impartial insight and adding real value to energy projects.

01

FAST RESPONSE

24/7 and fast-turnaround analysis for time-critical well integrity, production and remedial workover decisions.

02

SPECIALIST ANALYSIS

Independent processing, interpretation and validation across production logging, well integrity and reservoir evaluation.

03

FLEXIBLE DELIVERY

Single wells, multi-well programmes, consultancy, technical advice and tailored training — configured around client needs.

CONSULTANCY & TECHNICAL ADVICE

Objective challenge.
Stronger assurance.

Independent expertise at every decision point

No two assets are alike. ANSA helps operators and service companies extract more value from cased-hole data through independent review, interpretation validation, logging programme design, technical assurance and training tailored to the project.

01 Interpretation validation

04 Bespoke advisory services

02 Logging programme design

05 Tailored training

03 Technical advice

THE ANSA DIFFERENCE

Specialist capability—without the constraints

Trusted, impartial specialists delivering high-precision interpretation and responsive support worldwide.

30+

YEARS EXPERIENCE

Three decades of interpretation.

24/7

SUPPORT

Response when action cannot wait.

GLOBAL

COVERAGE

Aberdeen hub, supported by analysts based globally.

TOOL-AGNOSTIC

VARIOUS LOGGING TOOL SUPPORT

Support across all logging-tool providers and technologies.

CLARITY™ turns cased-hole expertise into faster, more consistent workflows

CLARITY™
POWERED BY PRISM

ANSA Digital combines specialist cased-hole knowledge with software development, automation and machine learning—creating focused tools around real analysis workflows, bottlenecks and decisions.

AUTOMATED MFC PROCESSING

Processing, QC and reporting reduce repetitive manual work and improve consistency while keeping the analyst in control of the final result.

SYNCHRONISED CAMERA ANALYSIS

Compare visual observations with measured pipe condition at the corresponding depth, then calibrate and size visible features in the same image plane.

LESS REPETITIVE PROCESSING

MORE CONSISTENT QC

MORE TIME FOR TECHNICAL JUDGEMENT

**INDEPENDENT
SPECIALIST
